

Meet the Experts Webinar Series

An Identity-First Future: Combining Biometrics, Documents and Databases for Rock Solid Identity Proofing

Tuesday 7th May 2024

LSEG RISK
INTELLIGENCE

Welcome! And thank you for joining us

Anu Kumar

Senior Marketing Manager,
Digital Identity & Fraud Solutions
LSEG Risk Intelligence

Chris Cortes

Senior Product Manager,
Trust and Fraud Signals
Onfido

Daniel Flowe

Head of Digital Identity
LSEG Risk Intelligence

Let's discuss:

- Trends and drivers behind enhanced identity proofing
- Key frameworks and standards: NIST IAL2, ETSI and more
- Creating identity verification workflows with multiple checks
- What the future holds for digital identity verification

Onfido & LSEG Risk Intelligence

Onfido, an Entrust company, makes digital identity simple.

We make it easy for people to access services by digitally verifying them using our Real Identity Platform. The platform allows businesses to tailor verification methods to individual user and market needs in a no-code, orchestration layer — combining the right mix of document and biometric verifications, trusted data sources, and passive fraud signals to meet their risk, friction, and regulatory requirements.

LSEG Identity Verification (formerly Global Data Consortium – GDC) specializes in global, low friction, compliant IDV.

Verify the identities of individuals and businesses – quickly, efficiently and with authority. We offer frictionless eIDV using a broad, deep and trusted global network of data sources to help organizations meet regulatory requirements and onboard more customers faster. Our solutions draw on 200+ authoritative, in-country data sources, across 55+ countries.

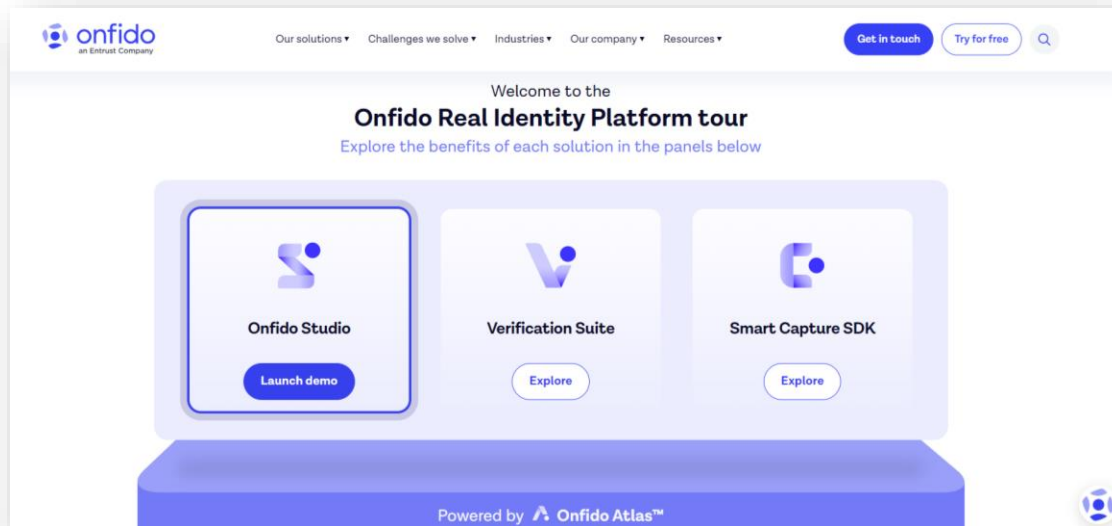

Together, Onfido and LSEG Risk Intelligence provide **high assurance, low friction, compliant identity verification.**

Let's discuss:

- Combining multiple identity verification checks into a single workflow
- The future of identity verification: what keeps you up at night?
- Audience Q&A
